

Spaces for  
the Senses

## Introduction

With architectural glass solutions as our primary focus, we strive toward solving your challenges through design, innovation and sustainability. We manufacture and supply glass walls, shower screens, railings and other related products to the glass industry, construction industry and players within the real estate development industry.

You can see examples of our work in several well-known buildings with high architectural ambitions - offices, commercial premises, public settings or private homes.

# About Invitrea

For us, glass is the primary focus area, and our goal is to create stylish designs with sustainability in mind. The design has been developed to provide products with a high-class functionality and long service life.

GSAB's operations include the brand Invitrea, where we create our own products within the categories Room, Railing, Bath, Exterior and Interior.

With a wide range of details and options, there are enormous possibilities to create exceptional solutions for several settings and needs.

Elegant and stylish designs, custom and quick-mount solutions with a perfect end result — we want to create fantastic and pleasant spaces for everyone. Quite simply, that's the idea implied by Spaces for the Senses!

## Tradition and commitment

While it is the future we strive for, it is our past we stand on. Without experience, we cannot achieve our quality goals. For six decades, our customers have made the highest demands on quality and perfection. This has given us a unique insight into the potential of glass, which has further contributed to the constant development of products and assortments.

# Materials and details

## Long sustainability

We always strive for stylish and timeless designs suitable for a variety of settings and styles. We apply high quality standards to our product manufacturing, which provides stable solutions with long sustainability and generous warranty periods.

## Custom solutions

While our standard products go well with most designs, some products require unique solutions. We can provide project-specific designs if required.

## Form and function

We have set high standards for form and function. At the same time, we want the end result to be perfect. Our craftsmen's requirements for quality and ease of installation are always a priority in our design work.

## Environment

We constantly work toward developing our business operations and adapting the material used in our products to ensure that these meet our high-quality standards and minimise environmental impact.

## Core values

### Design

Scandinavian design: design and aesthetics lie at the heart of our brand. We have a high functional standard with a technical design that facilitates installation and always gives a perfect end result.

### Innovation

We always use new types of materials and find new solutions to create even better results, increase efficiency throughout the value chain and minimise our climate footprint.

### Sustainability

Through our products and production methods, we want to actively contribute to our society's rapid transition to circular economy.

# Markets

We take a lot of pride in creating innovative solutions for companies operating in the following areas:

Property development  
industry

Glaziers

Retailers and wholesalers

# Invitrea Room

## Interior glass walls and doors

Invitrea Room provides a wide range of glass walls for a variety of purposes. The range includes ready-made solutions as well as profiles, details and options. The possibilities for creating unique and customised solutions are therefore numerous. All products have a minimalistic design and are easy and quick to assemble.

## Different ranges, different needs

Stylish and timeless glass walls that create pleasant spaces, public as well as private. We work actively with a long-term sustainability perspective and create solutions that provide long service life.

# Invitrea Bath

## Sauna and shower screens

We have several shower screen product ranges, divided into different series to suit most settings and needs. A wide range of details and options means you have a variety to choose from, so that you can get a solution that best suits your own style and taste.

Our sauna screens are timeless and perfect for public as well as private bathrooms. The design is modern and stylish with aluminium profiles and full glass walls.

Our environmental mindset is reflected in our products as they have been manufactured with wise material choices and have long service life.

## Invitrea Railing

### Interior and exterior rails

With Invitrea railing, you get a glass railing in a stylish and attractive design suitable for most settings, private as well as public. These easy and quick-mount railings render the perfect end result.

he products within Invitrea Railing are made of the highest quality, which provides stable solutions with long service life. The design is elegant and timeless, and is suitable for a variety of settings and styles.

# Invitrea Exterior

## Conservatories and canopies

Our conservatories extend the summer season and provide increased comfort. Our conservatory systems provide protection from weather and wind, and are always tailored to fit your measurements and the number of doors required.

Our stylish canopies with sleek fittings look well blended with the façade. The roof can be mounted easily and elegantly on the façade without disturbing the original architecture.

## Invitrea Interior

### Sliding doors for wardrobes

Utilise your space. Our sliding doors are dimensioned as per your requirements enabling you to best optimise your home or office space. A combination of modern design and top-quality material is reflected in our sliding doors.
